- Mobile & Laptop Repair

Other
- Customer Support
- SEO Basics (Beginner)

EDUCATION

Intermediate
Software Engineering (In Progress)
Karachi Board

Matriculation
Science Group — Grade A
Karachi Board

PROFESSIONAL PROFILE

IT support professional with 2+ years of hands-on hardware and software troubleshooting experience, now building practical skills in web development. Comfortable diagnosing technical issues, explaining them clearly to non-technical users, and building web applications with ASP.NET Core, React, PHP, HTML, CSS, and JavaScript. Currently completing Intermediate studies in Software Engineering.

PROJECTS

Nexus Service Marketing System
ASP.NET Core

Personal Project | C#, ASP.NET Core MVC, .NET 8, Entity Framework Core, SQL Server, Identity

- Built a web system for a telecom service company to manage customers, service orders, billing, and equipment in one place, with separate Admin, Accounts, Technical, and Customer areas.
- Implemented order processing with address feasibility checks and connection setup, plus billing, payment recording, and customer account statements.
- Used ASP.NET Core Identity for role-based access, and designed the SQL Server database (customers, orders, bills, payments, inventory) with EF Core migrations.

Give-Aid – Charity & Donation Platform (In Progress)
ASP.NET Core

Personal Project | C#, ASP.NET Core MVC, Razor Pages, Entity Framework Core, SQL Server

- Building a charity website that connects donors with charitable causes, with public pages for causes and programmes and an admin dashboard for managing the platform.
- Completed user registration and login (ASP.NET Core Identity), Admin/User roles, SQL Server with EF Core migrations, and an SMTP email service. Donation and payment features are the next planned step.

LawBridge AI – Legal Assistance Platform
React / Node.js

Personal Project | React, TypeScript, Node.js, Express.js, SQLite, Gemini API

- Built a web platform to help people in Pakistan understand legal issues, using an AI assistant to explain a case, related laws, urgency, next steps, and documents needed. It is a guidance tool, not a replacement for a lawyer.
- Created separate dashboards for users, lawyers, and admins covering case management, lawyer verification, messaging, notifications, and deadlines.
- Developed the Express.js API with SQLite, JWT login, password hashing, document uploads, and PDF export.

AUREUM – Luxury Watch E-Commerce
React / Node.js

Personal Project | React, Node.js, Express.js, SQL Server, Sequelize, JWT

- Built an online luxury watch store where customers can browse products, view details, use a shopping cart, and register or log in.
- Developed a REST API with Sequelize and SQL Server for products, users, orders, and reviews, with JWT authentication and admin-only routes.
- Added order logic with stock checks and price calculation. Connecting checkout and the admin dashboard to the API is still in progress.

PROJECTS (CONTINUED)

Carevia – Hospital Management System

PHP / MySQL

Personal Project | PHP, MySQL, JavaScript, Bootstrap

- Built a hospital website that lets patients find doctors and book appointments online, with separate patient, doctor, and admin sides.
- Implemented patient registration and login with hashed passwords and sessions, doctor search, time-slot booking, and appointment approval or rejection.
- Created admin pages to manage doctors (including photo uploads) and patients, plus patient–doctor messaging and notifications.

LuxeLap – Pre-Owned Laptop Store

Frontend

Personal Project | HTML, CSS, JavaScript, Tailwind CSS | Frontend only

- Built a laptop store website to showcase pre-owned laptops, with product detail pages and WhatsApp links so customers can contact the seller directly.
- Implemented login and registration, cart, wishlist, and admin pages to add, edit, and delete products and track orders, using JavaScript and browser Local Storage.

Luxe Interiors – Furniture Website

Frontend

Personal Project | HTML, CSS, JavaScript, Bootstrap 5, jQuery | Frontend only

- Built a responsive six-page furniture website with 32 products, brand and category filters, and product detail pop-ups to help visitors browse easily.
- Added a shopping cart with quantity controls and totals, a side-by-side product comparison, and contact form validation.

CHRONOS – Luxury Watch Website

Frontend

Personal Project | HTML, CSS, JavaScript, jQuery, Bootstrap 5 | Frontend only

- Designed a responsive multi-page watch storefront (collection, product details, cart, wishlist, checkout, blog, contact) with a premium dark-and-gold look.
- Added category filters, product image switching, cart total calculation, form validation, and scroll animations. Checkout is simulated.

NECTAR – Organic Grocery Website

Frontend

Personal Project | HTML, CSS, JavaScript, Tailwind CSS | Frontend only

- Built a responsive five-page grocery website where users can search products, filter by category, price, and rating, and sort results.
- Implemented a shopping cart with quantity control saved in Local Storage, a dark/light theme switch, and slider and scroll animations.

Personal Portfolio Website

Frontend

Personal Project | HTML, CSS, JavaScript (no frameworks)

- Designed a single-page portfolio presenting my skills and projects in hero, about, skills, projects, and contact sections.
- Built animations in plain JavaScript: custom cursor, particle background, typewriter text, animated skill bars, and scroll reveals. Contact form validates on the front end.

WORK EXPERIENCE

Mobile & Laptop Repair Technician

Karachi · **2022 – Present**

- Diagnose and repair hardware and software faults on mobile phones and laptops.
- Perform component-level repairs to restore device functionality and extend hardware lifespan.
- Explain technical issues to non-technical customers in clear, simple terms.
- Keep repair records and inventory organized to support efficient turnaround.

Sales Associate

Garments Shop, Karachi · **Approx. 1 Year**

- Helped customers choose suitable products by understanding their needs and giving recommendations.
- Handled sales transactions and kept track of stock to support daily shop operations.
- Built communication and customer-handling skills in a busy retail environment.
