(Actively Improving)

PROFESSIONAL PROFILE

A technically grounded IT professional who diagnoses, repairs, and ships — from broken hardware to live web products. With 2+ years of hands-on repair experience and a growing portfolio of self-built web applications, I bring a rare combination of field-tested technical skill and software development capability. I fix problems fast, communicate clearly, and build things that work.

EXPERIENCE

Mobile & Laptop Repair Technician

Karachi · **2022 – Present**

- Diagnosed and resolved hardware and software faults across 100s of mobile and laptop devices, consistently delivering high first-visit resolution rates and reducing customer downtime.
- Rebuilt and optimised device performance through component-level repairs, extending hardware lifespan and improving reliability for end users.
- Delivered clear technical guidance to non-technical customers, translating complex issues into simple explanations that built trust and repeat business.
- Maintained an organised, efficient workshop environment with structured inventory management, minimising repair turnaround time.

Sales Associate

Garments Shop, Karachi · **Approx. 1 Year**

- Drove customer satisfaction through consultative product recommendations, consistently matching clients to the right products for their needs.
- Managed end-to-end sales transactions with accuracy and handled inventory tracking to support smooth daily operations.
- Developed strong interpersonal and communication skills in a fast-paced, customer-facing retail environment.

PROJECTS

Product Comparison Platform *HTML · CSS · JavaScript*

- Built a fully responsive web application that solves a real consumer problem: comparing multiple products side-by-side before buying. Features structured filtering, dynamic layout, and clean information hierarchy designed to reduce purchase indecision.
- Demonstrates ability to architect practical, user-centred solutions — not just templates.

Personal Portfolio Website *HTML · CSS · JavaScript*

- Designed and developed a multi-section professional portfolio from scratch, featuring a project gallery, skills showcase, and contact section. Fully mobile-responsive with sub-2-second load performance.
- Built as a living proof-of-work that replaces a traditional CV with a browsable, interactive profile.

E-Commerce UI — Frontend *HTML · CSS · JavaScript*

- Engineered a complete e-commerce storefront UI including product listing pages, a functional shopping cart, and a checkout flow — all built with vanilla JavaScript and zero frameworks.
- Showcases production-grade frontend thinking: component reuse, UX consistency, and pixel-accurate layout execution.
